JOURNAL OF COMPUTATIONAL AND APPLIED MATHEMATICS

Author Index Volume 101 (1999)

Abad, J. and **J. Sesma,** Buchholz polynomials: a family of polynomials relating solutions of confluent hypergeometric and Bessel equations 237–241
Alzer, H. and **O.G. Ruehr,** A submuiltiplicative property of the psi function 53– 60

Blanes, S. and **L. Jódar,** Continuous numerical solutions of coupled mixed partial differential systems using Fer's factorization 189–202
Bultheel, A., see **Levrie, P.** 167–175

Cheng, S.S., see **Zhang, G.** 39– 51
Cong, N.H., Continuous variable stepsize explicit pseudo two-step RK methods 105–116

Damelin, S.B., Smoothness Theorems for generalized symmetric Pollaczek weights on (− 1, 1) 87–103

Farto, J.M., see **González, A.B.** 243–254
Floater, M.S. and **C. Gotsman,** How to morph tilings injectively 117–129
Foupouagnigni, M., A. Ronveaux and **W. Koepf,** Fourth order q-difference equation for the first associated of the q-classical orthogonal polynomials 231–236

Gao, Y., see **Zhang, G.** 39– 51
Getino, J., see **González, A.B.** 243–254
González, A. B., J. Getino and **J.M. Farto,** An algorithm for an eigenvalues problem in the Earth rotation theory 243–254
Gotsman, C., see **Floater, M.S.** 117–129

Jódar, L., see **Blanes, S.** 189–202

Koepf, W., see **Foupouagnigni, M.** 231–236
Koren, B. and **A.C.J. Venis,** A fed back level-set method for moving material–void interfaces 131–152
Kuijt, F. and **R. van Damme,** Monotonicity preserving interpolatory subdivision schemes 203–229

Levrie, P. and **A. Bultheel,** A note on the relation between two convergence acceleration methods for ordinary continued fractions 167–175

McCarthy, C.M., The tallest column — optimality revisited 27– 37
Messina, E., see **van der Houwen, P.J.** 153–165
Musschoot, C., A Lanczos-type method for solving nonsymmetric linear systems with multiple right-hand sides–matrix and polynomial interpretation 61– 85

Qiu, Y. and **D.M. Sloan,** Analysis of difference approximations to a singularly perturbed two-point boundary value problem on an adaptively generated grid 1– 25

Ronveaux, A., see **Foupouagnigni, M.** 231–236
Ruehr, O.G., see **Alzer, H.** 53– 60

Sesma, J., see **Abad, J.** 237–241
Sloan, D.M., see **Qiu, Y.** 1– 25

Trench, W.F., Invertibly convergent infinite products of matrices 255–263

van Damme, R., see **Kuijt, F.** 203–229
van der Houwen, P.J. and **E. Messina,** Parallel Adams methods 153–165
Venis, A.C.J., see **Koren, B.** 131–152

Wendland, H., On the smoothness of positive definite and radial functions 177–188

Zhang, G., S.S. Cheng and **Y. Gao,** Classification schemes for positive solutions of a second-order nonlinear difference equation 39– 51

Elsevier Science B.V.
